

## **The St. Joe Company has engaged The Shaw Group Inc.**

June 21, 2010

The St. Joe Company has engaged [The Shaw Group Inc.](#) to assist in oil remediation efforts specific to St. Joe beaches. The Shaw team will remove tar balls from the WaterColor Resort and WaterSound Beach every day in two shifts; between 6am and 10am and again between 4pm and 8pm. Guests at our beaches may see the workers in action during these times. They are focused on cleaning up any oil related material so that our guests may continue to enjoy our beautiful beaches. No swimming advisories have been issued and the beaches are still open. Current photographs can be found at the [WaterColor Inn website](#).

The Shaw Group is a diverse global corporation whose specialties include oil related remediation services. Shaw employs solutions such as bioremediation to accelerate the restoration of impacted soils, sediments, beaches, and marine environments. They are a significant resource with more than 20,000 employees with a wide range of technical expertise in strategic locations throughout the world.

St. Joe has coordinated The Shaw Group's efforts with the appropriate authorities. The expeditious clean-up of our beaches is a top priority for the Company. Shaw will be responsible for assessing the situation and ensuring that appropriate remediation steps are taken to protect St. Joe properties and allow our guests to continue to enjoy the beach.

We will continue to keep you informed here on our [update site](#). You can download the following [map](#) to see the current NOAA trajectory of the Deepwater Horizon Incident and the estimated distance from our properties.
