

Color Palette - Sunset Ridge and Sunrise Ridge

The outer crescent of houses along Western Lake draw upon the calm, dappled tones of the forested edge and march borders of Western Lake for their coloration. These 'inland waterfront' houses act as imported 'facades' to this other body of water and are visible both from the County Road 30-A causeway and the neighborhoods across the lake.

The main body color is to be selected from the appropriate approved color palette. The main body color may not be the same as that of any other residence within two lots to either side, one directly across/behind, or one diagonal. The trim color can be the same or lighter than the body, but not stark white. The accent color is to be a suitable contrasting or complimentary color.
