

Color Palette - Beach Lane

The beach cottages along County Road 30-A continue the pattern of development established by Seaside to the east. The colors of the houses are inspired by and complement the emerald waters of the Gulf, the multi-hued Florida sky, the sun washed dunes and seashells, and the native grasses and scrub.

The main body color is to be selected from the appropriate approved color palette. The main body color may not be the same as that of any other residence within two lots to either side, one directly across/behind, or one diagonal. The trim color can be the same or lighter than the body, but not stark white. The accent color is to be a suitable contrasting or complimentary color.
